

# San Diego International Airport

## OVERVIEW

Founded in 1928, San Diego International Airport is the 30th busiest airport in the country in terms of passengers and the busiest single-runway commercial service airport in the nation.

The Airport is conveniently located three miles northwest of downtown San Diego and sits on 661 acres.

Studies have projected that at San Diego International Airport:

- Annual passenger traffic will to between 27.1 million and 32.7 million by 2030.
- Total annual aircraft arrivals and departures will increase to 260,000 by 2015.
- The Airport's single runway could reach maximum capacity of 300,000 arrivals and departures by 2021.
